Preface

The Pumi Pedigree Database Online is one of the most powerful tools we have to improve the Pumi and keep it true to its original, loveable, smart, active, healthy form. This manual serves to assist you in using the database to its full potential, meaning that you will be not only reading, but adding to the information available here.

This database is meant for all Pumi owners all over the world. The Hungarian Pumi Club of America pays for the license for the software, but it is truly a worldwide effort. Each breeder should add their puppies as they're registered in their country. Then each owner should keep up the title and health information for their Pumi(s).

A Bit about Data Privacy

This application is hosted in The Netherlands. The European Union of which they are a part, has a *General Data Protection Regulation* (GDPR). What it means for us is that no one's name can be listed as owner or breeder without their permission. A kennel name is OK – it's the personal information like name, address, phone, etc. that is protected by the GDPR.

If you want anyone using the system to be able to see that you are the owner and/or breeder of a dog, you must agree to have your information "public". On your account into, click the "I want a public page" checkbox. This allows you to add your name to the dog as breeder and/or owner and have it display for others' view. When a user sees your name (or kennel name) on the dog, they can click your name and it will bring up another screen with additional information about you (like country). If you would like people to be able to contact you, click the checkbox for "a contact form so people can send me an email" on your account information. Your email address is never displayed on this application to prevent unwanted bots from obtaining your email address.

Helpful Hints

1. **Resident Country:** When you're updating your dogs, the Country of Origin is assumed to be the Resident Country unless that dog has changed countries. If it has changed countries, the current valid Registration Number should be the one from the Resident Country and if known, the original registration number should go in the Other Registration Number field. For example, if a dog was imported from Hungary:

Reg. No.: DN12345678

Other Registration No.: 1234/19

Resident Country: United States

Country of Origin: Hungary

2. **Hungarian registration numbers** all begin with "MET.Pm." and for simplicity's sake, we are leaving off that portion. If the dog is Hungarian, the Reg. No. would just be the 4 numbers, slash, 2-digit year of birth (e.g. 1234/19). That is not true of other countries however. Most have a very short letter prefix to tell you in which country they are registered.
3. **Stud Dog List:** if you want to have your dog listed in the Stud Dog List, you need to 1) be listed as the owner of the dog, and 2) set the BreedDog field to "Active". This will automatically add your dog to the list of stud dogs. If you have frozen semen available for him, check the Frozen Semen Available checkbox.

4. **Breeder List:** On your account information, check the box for “Add my name to the breeders list.” As you can see this is the same screen as for Owners, just with more information. Putting yourself on the Breeders List will add you to the list of breeders on the website. Please be sure to add a photo for your listing.
5. **Account Information:** When you chose to get a login, you filled out some fields and clicked “Submit”. You can go back and change those fields as needed by clicking the person icon  in the upper right-hand corner of the screen and choose “edit my account”. Some of the information in this article will be associated with the fields and checkboxes on that screen.

How to Use This Document

Each chapter is defined by the choices you have at the top of the screen and the items that go with them:

home search ▼ add a dog ▼ trial mating breederslist ▼ stud dogs Litter ads more ▼									
Home					Breederslist				
Search					Breederslist				
Search					Search on map				
Advanced Search					A B C D E				
Common Ancestors					F G H I J				
A B C D E					K L M N O				
F G H I J					P Q R S T				
K L M N O					U V W X Y				
P Q R S T					Z @				
U V W X Y					Stud dogs				
Z @					Litter ads				
Add a dog					More				
Add a dog					Help				
Add a litter					Health information				
Trial mating					Sign up				
					Contact				

When you see the main menu item duplicated in the indented item, it goes to the same item. For example, clicking the “search” item on the main menu is the same as hovering over that menu and selecting the first choice which is “search”. This just saves a bit of time.

Home

This goes to the *Home* screen.

Welcome

In the recent past, it proved more and more important to make good decisions by matching the right parents of future litters to maintain or even improve the health of our beloved animals by limiting/preventing inbreeding and the passing on of hereditary diseases. Our goal is to assist all breeders to make healthy breeding decisions. Future dog owners can check the background of a puppy they are intending to buy.

The most important part of this database are the (international) health test results collected from breeders, clubs and databases from various countries. This database gives you the possibility to calculate the inbreeding coefficient (COI) of a future litter, to check health-results of your own or other dogs or just to browse through the pedigrees. After you sign up (which is free of charge) you can log in for additional search options on health-issues and you also can make a pedigree analysis.

As a (former) breeder or owner, you can help to complete the pedigrees, add photos and contribute health-information. You can find more details under the tab 'add a dog'. This information is essential for providing the most accurate results concerning inbreeding and health issues.

Feel invited to have a look around.

From here you can log in or do any of the links listed above. The “Random results” are just a random selection of dogs, stud dogs, and kennels.

You may search for dogs and view their pedigree without signing up, but there are more functions available if the user creates a username/email and password.

Free Sign-Up

You may sign up for free.

✕

Sign up

After you have clicked on the sign up button we will send you an e-mail with a link you have to click on to confirm your registration.
If you do not receive an e-mail please check your spambox or contact us.

Free Standard Account

Get a free standard account to see more information and add or edit dogs.

First Name: *	<input type="text"/>	Account name: *	<input type="text"/>
Last Name: *	<input type="text"/>	Password: *	<input type="text"/>
e-mail: *	<input type="text"/>	confirm password: *	<input type="text"/>
country: *	<input type="text" value="-"/>	* = required	

By signing up, you agree to our terms.

Sign up for a standard account

The Administrator does not need to approve this.

Also on this screen (see below) is the ability to sign up as a breeder/owner. This allows the user to edit their own dogs and add others. It also allows the user to create their own *Breed Page*.

Free breeder/owner account:

With a free breeder/owner account you can:

- add your name as owner or breeder to a dog
- get a page with your dogs and, if you want, your contact information
- add your name to the breeders list
- put your dog(s) on the studdog page
- put your litter(s) on the litter page.

Contact information (no required fields):

address line 1:

address line 2:

zipcode:

city:

state/province/region:

phone number:

kennel/owner:

website:

(www.example.com)

☐ Show (also) my personal name.

(If you have not entered a kennel name this is a required field.)

☐ I want a public page.

☐ Add my name to the breeders list.

Show this information on my public page:

☐ my full address

☐ only my city and region

☐ my phone number

☐ a contact form so people can send me an email (the e-mail address will not be shown on this website)

Short info on your kennel:

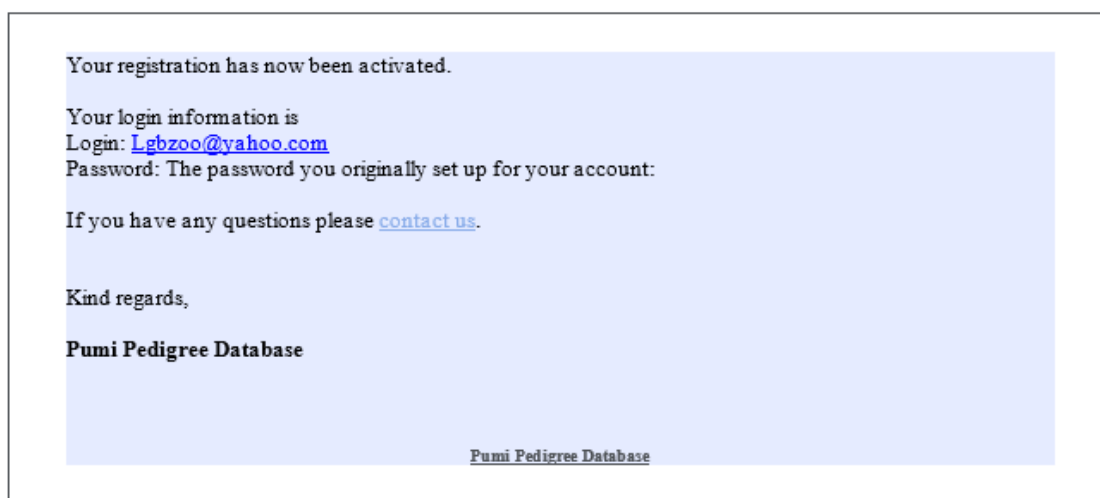

We will show your country, your kennel name and/or personal name on this website. This type of account has to be approved by an administrator. By signing up, you agree to our terms.

[Sign up for a breeder/owner account](#)

Field/Checkbox	Explanation
Show (also) my personal name (If you have not entered a kennel name this is a required field.)	This will allow the display of the name of the owner and of the breeder. The kennel name will display if you fill out the <i>Kennel/owner</i> field, and if that's blank, your name will display instead. Best to figure that whatever you want to display should go in the <i>kennel/owner</i> field.
I want a public page	If you want your kennel/owner name to show up on a dog, you must check this box. This complies with the EU's GDPR regulations where a person must agree to have their name be public.
Add my name to the breeders list	This will have your kennel/owner show up as a breeder on the Breeder List.
Show this information on my public page: my full address only my city and region my phone number	You can choose which information to display on your breeder page. Suggestion: only my city and region.

Field/Checkbox	Explanation
a contact form so people can send me an email (the e-mail address will not be shown on this website)	If you choose this option, there will be a contact form on your breeder page so they can contact you through the system. Please do <u>not</u> put your email address anywhere for publication because it can be misused. The PDO contact form requires that a person check the box that they are a real person and not bot.
Short info on your kennel:	Optional text that says something about your kennel.

The user fills out the form and presses save. Then they will get an e-mail with a link to confirm their email address. Once it's confirmed by the user, the Administrator must approve it. This could take up to a day. When approved, you'll receive an email.

If you signed up to be on the Breeder List, please add a photo for your kennel. Go to your listing and click the  icon next to your kennel name. This will bring up you account screen and you can add a photo in the lower left-hand corner of the screen.

Search

The search uses a "contains" function so it will find any part of a dog's name that contains what you keyed in. See the example in the screen below.

The screenshot shows the Pumi Pedigree Database website. At the top, there's a navigation bar with links like 'home', 'search', 'add a dog', 'trialmating', 'breederslist', 'stud dogs', 'litter registrations', 'results', and 'more'. Below this is a banner image of three Pumi dogs running on grass. The main content area is titled 'Animal search' and features a search form on the left and a list of search results on the right.

Search Form:

- Name:** A dropdown menu with 'szurke' selected.
- search in field:** A dropdown menu with 'Name' selected.
- sort by:** A dropdown menu with 'Name' selected.

Search Results:

Name	RegNo	Color	DOB
*Szűcsi Szürke Barát ♂	OMKT 73	Born Gray	09/18/1948
Cypress Bay's Szurke Emdenat Bride's ♀	DN53309908		03/31/2018
FI UCH Kaffogó Szürke ♂	FINER44251/01		01/05/1999
Pásztortűz Csillaga Szürke ♂	4146/00	Silver Gray	11/10/2000
Szürke Bundás Andi ♀	328/88	Silver Gray	10/22/1988
Szürke Bundás Blacky ♂	326/88	Silver Gray	10/22/1988
Szürke Bundás Bundi ♂	321/88	White	10/22/1988
Szürke Bundás Csóvi ♀	327/88	White	10/22/1988
Szürke Bundás Gyuri ♂	325/88	Silver Gray	10/22/1988
Szürke Bundás Szundi ♂	323/88	Silver Gray	10/22/1988
Szürke Bundás Tapsi ♂	324/88	Silver Gray	10/22/1988
Szürke Bundás Tücsök ♂	322/88	Born Gray	10/22/1988
Szürkebarát Balhé ♂	5016/04	Born black	04/07/2004

You can also search on RegNo, Color, and DOB and you can choose to sort by Name or DOB.

The search will be carried out as you key in the word(s).

You can also list all dogs in the database whose name begins with a letter – see the letters in the screen above.

From here you can click on the *Advanced Search*.

Search Issues

The search capability is very strong, using an “includes” function, but it’s still easy to search and not find a dog for several reasons. There are many, many old dogs in the system, thanks to Tamara Langer’s spreadsheet that she had compiled many years ago. If you’re searching for an older dog (1960-2000), it might just be because the name you’re searching on isn’t quite the same as the name in the system for the following reasons.

Hyphen

If a name includes a hyphen, search without using the hyphen because the system will look for both without and with the hyphen. If you search using the hyphen, it will look for only the dog names that have the hyphen. For example, if you search for “Cseri Subas”, it will find those names with and without a hyphen. If you search for “Cseri-Subas” it will look for all those only with a hyphen.

There are several kennel names that were imported into the database without hyphens and need to have them. I am asking PDO to change all of them at some point.

It’s still best to search without using the hyphen.

Commas

Commas can be written differently (even though they may look the same) and will not find a dog if you include the comma. The best thing to try is type in the dog name up to the comma. For example, one kennel name is

“Jellum’s”. If you type in “Jellum” it will list all those dogs. If you type in “Jellum’s” it may not find any of them depending on if you’re using a PC or a mobile device. The PC seems to be more stable that way.

Kennel Name Order

There are some older dogs where it’s not clear whether the kennel name comes before the specific name or after it. If you search for an older dog and can’t find it, try reversing the names. For example, the system had both “Csutak Ragendorfi” and “Ragendorfi Csutak”. They both had the same registration number so we could identify and correct it. But it might be better to just search on the kennel name only and see what it finds.

Call Names

Many times in Hungary, the dog’s call name is added to the registered name. If there are multiple names, it’s best to search on the kennel name plus only one other name, then compare registration numbers to make sure you have the right dog. For example, Sziki Mara and Sziki Mara Morgó were both in the database. The “Morgó” was moved to the call name and the other one deleted.

Advanced Search

The *Advanced Search* includes every single field of information on a dog. For example, if you wanted to find a dog whose color was KB/KB and HD A and lived in Hungary, you can do that. You must have a logon ID to use the *Advanced Search*.

Common Ancestors

On this page you can compare pedigrees and search for the first common ancestors to, for example, trace genetic defects.

pedigree analysis

Other heath info:

You may only add health information for a dog you own or bred. Please be able to verify this information if asked.

Below are the list of fields that can be filled in with suggestions:

Field	Type	Description
Information		
Registration Certificate:	Date	This field is going to be removed. It's for a club that issues registration certificates.

Field	Type	Description
Reg. No.:	Text	This is the official registration number for the dog <u>in the country in which he resides</u> . This need to match the “Resident Country” if there is one, or “Country of Origin” if not. For Hungarian numbers, leave off the “MET.Pm.”.
Other Registration No.:	Text	If the dog has another registration number from a country of origin, it goes here.
Sire:	Search	Type in name and the system will find it if it's there. Type in the least amount of letters to get a reasonable list of possible dogs.
Dam:	Search	Type in name and the system will find it if it's there. Type in the least amount of letters to get a reasonable list of possible dogs.
Sex*:	Radio button	Mandatory field
DOB:	Date	Date of Birth
DOD:	Date	Date of Death
Cause of death:	Text	
Registered Colour:	Dropdown	The color on the registration certificate
Actual Color:	Text	Actual color <u>if different than registered color</u> .
Resident Country:	Dropdown	If it's the same as the “Country of Origin”, leave it empty
Country of origin:	Dropdown	The country where the dog was born.
PreTitle:	Text	All the titles that come prior to the name.
PostTitle:	Text	All the titles that come after the name.
Photo: 	New window	This brings up a new window. You must check that you have the authority to upload this video, then you can search your computer and upload, then Save. Up to 5 photos are allowed, but the first one is the one that shows on the pedigree. SHOW ONLY THE DOG – win photos are OK, but crop to just the dog.
Breeder:	New window	You must search for the person in the system or an admin can add them if they don't exist. This will only show on the main screen if the person has agreed to a public page (see logon screen). People can only choose their own name (admins can add others).
Owner:	New window	You must search for the person in the system or an admin can add them if they don't exist. This information will only show on the main screen if the person has agreed to a public page (see logon screen). People can only choose their own name (admins can add others).
Microchip No:	Text	
DNA ID:	Text	This is for the ID number for DNA identification purposes. For AKC dogs, it always starts with “V”.
BreedingDog:	Radio button	Choices are: <ul style="list-style-type: none"> • Active: this allows the dog to be shown in the list of stud dogs provided the breeder has chosen to have their name public. • Retired: • Pet: this shows a purple star by the their name (hope to change this)

Field	Type	Description
Frozen Semen Available	Yes/Blank	If frozen semen is available from this dog, click "Yes". There is not a "No" option so that if frozen semen is not available it's blank and won't show up on viewing the dog's info. (This especially makes sense if the Pumi is a female.) We're hoping this field will eventually be available on the Stud Dogs listing.
Source:	Text	Write the source (e.g. another database) from where the dog was added.
Comments:	Text	Any comments you wish to make.

Details

Call Name:	Text	What the dog is normally called.
Height:	Text	Use measurement for that country, but preferably both inches and centimeters.
Color loci		These below have mouseover examples on the screen.
• K locus:	Text	Dominant black: Show both genes separated by a slash (/), e.g. KB/KB or KB/ky.
• A locus:	Text	Show 2 genes of the four possible (Ay, at, aw, a)
• B locus:	Text	Black/brown: usually B/B
• D locus:	Text	Dilution: usually D/D. There are several dilution genes and sometimes born gray are d1/d3
• E locus:	Text	Red/Yellow gene: in Pumi this is the white or light fawn color. White is e/e. Non-white is E/e or E/E.
• S locus:	Text	Spotting/piebald gene: All Pumik are S/S as far as we know.
• H locus:	Text	Harlequin gene: should be h/h (not harlequin)
• M locus:	Text	Merle: all Pumik should be m/m (not merle)
• Markings:	Dropdown	Two dropdowns: Black & Tan, Brindle

Health (only owner or breeder can add/edit these fields)

CHIC #:		In the US, if all recommended tests have been completed, a CHIC number is given by OFA. Not necessary for European dogs.
• HD*:	Dropdown	Hip rating. (Anything starting with HD is European.)
• HD info:	Text	For the US, this is the OFA ID.
• ED*:	Text	Elbow dysplasia rating
• ED info:	Text	For the US, this is the OFA ID.
• Patellar Luxation*:	Text	The rating
• Patellar info:	Text	For the US, this is the OFA ID.
• DM*:	Dropdown	Choices: clear, carrier, affected, clear b.p, clear b. o. The b.p. means "by parentage (parents are both clear), and b.o. means by offspring (all offspring are clear so parent must be). The latter is not used in the US.

Field	Type	Description
• PLL*:	Dropdown	Choices: clear, carrier, affected, clear b.p, clear b. o. The b.p. means "by parentage (parents are both clear), and b.o. means by offspring (all offspring are clear so parent must be). The latter is not used in the US. It's easy to miss the carat to expand this field. Don't enter the information in the Spine field accidentally.
• PLL ID:	Text	For the US, this is the OFA ID.
Spine:	Text	Since this is new, just write the findings if there is a problem. We may change this to a dropdown once we know more.
Other health info	Textarea	This is for any health issues not listed above.

Please take note of the information at the bottom of the page:

You may only add health information for a dog you own or bred. Please be able to verify this information if asked. The Admin will only request verification if there is some question about the health clearance info.

You may:

- *Save* and the popup window will disappear after saving the dog
- *Save and go to pedigree* which will take you to the dog's page
- *Cancel*

Add a Litter

Click on *add a dog* on the dropdown menu (see below), and then click *add a litter*.

This will bring up a popup window:

You must find the parents first. If you find the dam and she has any existing litters or puppies in the database, it will list them at that time. If you choose an existing litter, any puppies from that litter will automatically be added to the list:

Litter form

Mother*:

...

Existing litters mother:

-

Father*:

...

Date of Birth*:

CONTINUE

Cancel

Key in the mother's name (the system will give you the choice) and the father. Put in the date of birth, then click *Continue*. The screen changes to:

Litter form

Mother*:

Abiqua Opal

Father*:

Szürkebarát Ebenguba

Date of Birth*:

12/25/2021

Breeder:

+ Name

Abiqua Pumik

The name of the owner of the dam is automatically added as the breeder of record.

The following is added to the bottom of the screen.

Children

- Children with the same mother, father and DOB have been added automatically. You can add new animals or search for existing animals in the name field.
- All new and existing children in this list will get the mother, father, date of birth and breeder from the fields above.
- Removing animals from this list will not delete existing animals or remove them from this litter, but they will not be updated with possible changes.
- Entries in the grey line are applied to all animals on the list.

☐ Set the breeder as the owner of the children:

+ add animal

		Name	Reg. No.	Other Registration No.	Se

Please note the instructions above. We recently had a upgrade to the pedigree application, and some of these instructions are new.

- Children with the same mother, father and DOB have been added automatically. You can add new animals or search for existing animals in the name field.
- All new and existing children in this list will get the mother, father, date of birth and breeder from the fields above.
- Removing animals from this list will not delete existing animals or remove them from this litter, but they will not be updated with possible changes.

These all explain how the *adding a litter* function works. If there are already puppies from this litter in the database, they will be added automatically when this screen shows up. The ones already in the database and added automatically cannot be changed except that the breeder will be added automatically along with the other fields that you can update.

The next one talks about a great function of the this screen:

- Entries in the grey line are applied to all animals on the list.

So for example, if you put "United States" in the gray line above on the County of Origin field, that will populate that field for all of the puppies. Same applies to color, so you can easily mark all puppies as "black".

The default screen shows 3 puppies (in addition to any added automatically), but you can add more lines by clicking the **+ add animal** button. All the Dog Info fields are available here except *Breeder* and *Owner*. (If there is an owner for the dam, the owner will automatically be listed as the breeder on all the puppies.)

As you type in a name, it will check to make sure the dog isn't already in the database. If there is another dog of that name in the database, it will list that name and you can choose it to become part of this litter.

Change all:			mm/dd/yyyy
X	new	Napos Nesztor	mm/dd/yyyy
X	new	Napos Narcisz	mm/dd/yyyy
X	new	0 results	
		...	

Most of the fields available for individual dogs are available here by scrolling to the right, including all the health information, and color DNA information, microchip info, etc.

Clicking the **Submit** button will add each dog in the litter individually to the database! Done!

You can also update an existing litter using this screen. Go to the dog record for either sire or dam and click "Add litter". The existing litters will be listed and choose one. It will show the litter and you can update all the puppies at once.

This is an easy way to update the breeder of a litter if you didn't have one originally. Go to the dam's page and make sure there is an owner for the dam. Click the "Add litter" choice on the hamburger and choose the litter. It will show the puppies with 3 additional lines – delete them by clicking the "X" at the left. Then click "Save" and the litter will now have the breeder's name on all the puppies. (This does not work to remove a breeder's name.)

Documents

-

COI

You can choose how many generation to use in the COI, from 5 – 10. None of this is editable.

Documents

The *Documents* hamburger allows you to add files. Click on the Documents link to get a popup window to add a file. One suggestion might be the Optimal Selection DNA test results document.

Pedigree

The default is a 5-generation pedigree with a lot of information on the closer ancestors. You can set what you want to see on this menu at the top of the pedigree:

generations ☐ -vertical pedigree generations with photo

You can go from 3 to generations. A vertical pedigree shows all siblings.

The default is that photos of dogs only show for the first 2 generations, but you can change it to from 0 (no photos at all) to 7 generations.

You can also choose which dog information to see in the *filter information*, none, all, or specific fields.

Because of the size of the pedigree, only part of it will be shown here.

Pedigree Analysis

Click on the *Pedigreeanalysis* tab.

pedigree **offspring** **Siblings** **Pedigreeanalysis**

This screen is in parts:

Completeness of the pedigree

Completeness of the pedigree

This table shows the completeness of the data in this pedigree. The more complete, the more reliable the COI and the AVK are calculated.

generations:	1	2	3	4	5	6	7	8	9	10	total
complete %	100%	100%	100%	100%	100%	93.8%	89.1%	86.7%	84.8%	82.2%	84.7%

This tells you how many generations have missing dogs. With the Pumi, very few go back 10 generations without missing dogs because of the incorporation of farm dogs into the pedigrees.

Bloodpercentage

Bloodpercentage

You can re-order and filter this table.

- name: click on the name to light up this dog in the pedigreechart
- line: M = only on fathers side, F = only on mothers side, FC = first common ancestor, C = common ancestor
- blood: %= percentage of genes from this ancestor with typical values of 50% for parents, 25% for grandparents, 12,5% for great-grandparents, etc.
- tot: = total number of times this ancestor appears in this pedigree
- 3 - 4: = in this generation this dog appears 3 times on the fathers side and 4 times on the mothers side in the pedigree

Name	ancestor line	blood %	total	1	2	3	4	5	6	7	8	9	10

Mocskos Brácsás	C	8.11%	21-21							0-1	3-5	8-2	10-13

There are instructions on what this screen means right at the top:

You can re-order and filter this table.

- name: click on the name to light up this dog in the pedigreechart
- line: M = only on fathers side, F = only on mothers side, FC = first common ancestor, C = common ancestor
- blood: %= percentage of genes from this ancestor with typical values of 50% for parents, 25% for grandparents, 12,5% for great-grandparents, etc.
- tot: = total number of times this ancestor appears in this pedigree
- 3 - 4: = in this generation this dog appears 3 times on the fathers side and 4 times on the mothers side in the pedigree

You can scroll this screen through every dog in the pedigree for 10 generations. You can also sort any column by clicking on the header.

Pedigree Chart

PedigreeChart

All dogs from the normal 10 gen. pedigree are shown in a different type of pedigree in which all dogs are only shown once. Parents and children are connected by lines. With this pedigree it can be easier to see how a dog is related to its ancestors.

With the control panel near the top of this pedigree you can zoom in, zoom out or go full screen. You can move with the scroll bars or by pressing the middle mouse button (if available)

Click on a dog to light up the parents in green and the children in yellow.

Field border color:

- blue border = only in fathers pedigree
- red border = only mothers pedigree
- black border = common ancestor
- hick black border = first common ancestor

- field background color: blue= male, pink = female

- connecting lines: blue= towards father, red = towards mother

This pedigree is only supported by up-to-date browsers.

Printed Pedigrees

On the same bar on the right, you can create pedigrees in PDF format for printing. Click on the *Pedigree* link.

pdf style

This will generate a pdf. Depending on your browser-settings this will show up in a new tab or it will be in your downloads-folder (Ctrl+J (Windows, Linux, and Chrome OS) and ⌘-Shift-J (Mac)). You can view or print it with a pdf-reader. Here you can choose the type of pedigree and choose what options you want to show. Sometimes with long names or titles not all text will fit in the available space.

☒ include titles
☒ include detailed information
☒ include pictures in first generations

Horizontal

Vertical

Vertical Enhanced

Horizontal Enhanced

You can choose whether to include titles on the dogs or other information, or whether to include photos in the first generation.

At this point, the upper left choice is the only one that's been tweaked for the Pumi database and does create a nice looking pedigree.

01/31/2021 - Pumi Pedigree Database does not accept liability for any errors or omissions in the information.

Hamburger Choices

The “hamburger” is the 3 parallel horizontal lines (☰) after a dog’s name. If you click on this it will give you options. The options are shown to the left and described below.

Edit

This brings up the *Add a Dog* screen and you can edit all the data there. See “Add a Dog”.

Add Sibling

This brings up the *Add a Dog* screen but with the fields pre-filled with the original dog’s info, so you must change the name, registration number(s) at a minimum. The sex is not filled out and is a mandatory field.

Add Child

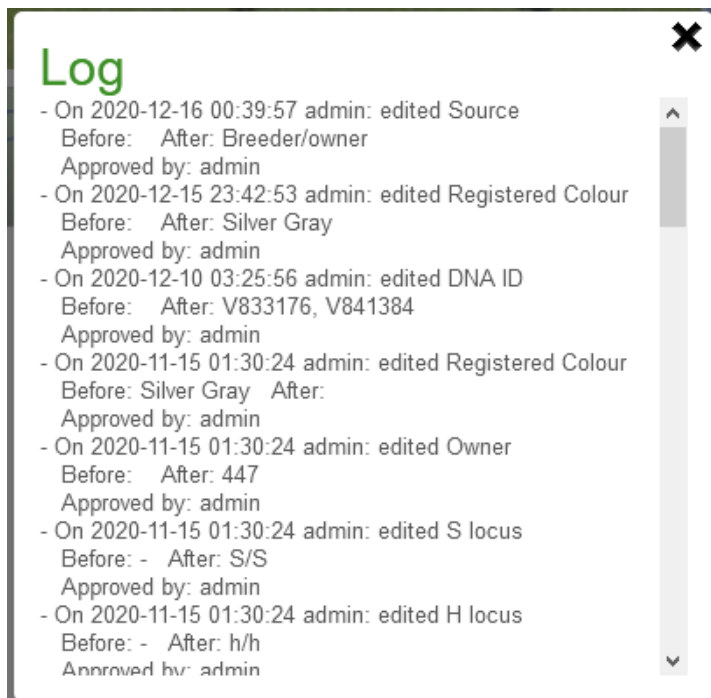

This brings up the *Add a Dog* screen and all fields are blank except the sire or dam field (depending on the sex of the parent).

Add Litter

This brings up the *Add a Litter* screen with the sire or dam field (depending on the sex of the parent) pre-filled.

Log

This screen shows the changes to the dog’s record, for example:

Trial Mating

This brings up the *Trial Mating* screen with the sire or dam field (depending on the sex of the parent) pre-filled. You can also get to this screen from a link on the pedigree header. Or a blank screen from the top menu.

Delete (Admin only)

There is no reason to delete a dog unless it is a duplicate of another one in the system.

You must be sure that there are no direct descendants before deleting a dog. If there are, you can change the sire or dam to the correct record prior to deleting it. The Direct offspring/Litters heading must say “no data” before deleting! Only a user with Administrator privileges can delete a dog. If you need to delete one, contact Chris.

Remove as Parent

This is only an option on the pedigree portion of the screen. This will remove the dog as a parent on the pedigree in case of an error.

Trialmating

This allows you to see pedigree and pedigree analysis information for a potential breeding. You can fill in the parents or grandparents. The pedigree screen is identical to the screen for an actual dog so it's not displayed here.

The screenshot shows a web form titled "Virtual pedigree" with a light green background. Below the title is the instruction "Choose the parents or grandparents to make a virtual pedigree." The form is organized into two main columns. The left column contains a "virtual animal" field, a "Father" field with a dropdown menu, and a "Mother" field with a dropdown menu. The right column contains four fields for grandparents: "grandfather 1", "grandmother 1", "grandfather 2", and "grandmother 2", each with a dropdown menu. The word "or" is placed between the Father/Mother fields and the Grandfather/Grandmother fields, indicating an alternative selection path.

Breederslist

Adding a Breed Photo

If you signed up to be on the Breeder List, please add a photo for your kennel if you haven't already. Go to your listing and click the  icon next to your kennel name (or click on the person icon in the upper right-hand corner of your screen). This will bring up your account screen and you can add a photo in the lower left-hand corner of the screen. Click on the blue square to bring up a popup screen allowing you to upload a photo.

photo/logo:

save

Cancel

For those who checked the *Add my name to the breeders list* checkbox, their kennel will be listed here. When you go to the first (search) screen, there is a random listing of breeders shown. You can then query by name and/or country. (We aren't using the *Region* shown on the screen below.)

Using the Breeders List

Click on the "breederslist" menu item at the top of the screen. This will bring up a screen where you can search for breeders by:

- Name
- Country
- Region (which we're not using at this time)

It also shows a random list of breeders in random order.

The screenshot shows a web interface for searching breeders. At the top is a green navigation bar with a 'search' button and a list of letters A through Z. Below this is a sidebar on the left with the heading 'breeders' and a 'search' button. The sidebar contains three input fields: 'Name' (a text box), 'country:' (a dropdown menu with a '-' symbol), and 'Region' (a text box). The main content area is titled 'random results' and displays two breeder listings. The first listing is for 'Serteperti' from 'Hungary, Hungary' and includes a photo of three poodles. The second listing is for 'Heather Stimson' from 'United States, NC' and includes a partial photo of a dog.

If you click on a breeder on the results, it will go to their page.

Clicking on the dog goes to that dog's web page.

We are hoping to have the availability of frozen semen show up on this list. Stay tuned!

Litter Ads

Being able to see upcoming litters, pedigrees, and photos of the parents in the database is going to be a wonderful opportunity to see if there are any puppies worldwide that you might want to Import, or get a puppy from a US breeder. Because no one was using the litter ads (duh!), I created one for a litter we have planned for this fall. And now, thanks to Aurora, we have....two litter ads that I can use to show you what the screens look like.

You can reach the litter ads on the top menu – see the illustration below. If you want to see them, just click the “litter ads” option.

This will take you to the list of litter ads (all 2 of them). When there get to be more, you can filter the list by:

- Mother's Name

Last updated: 16 February 2022

page 34 of 53

- Father's Name
- Kennel Owner
- Country
- Region

Below is the list screen, sorted newest to oldest. Unfortunately, you have to give it a specific date – you can't just say "due in the fall of 2021", but at least I could say that on the litter description.

Below this information is the pedigree of the litter that looks just like a single dog's pedigree so I won't show it here.

This litter ad shows up on the mother's and father's page as below:

Direct offspring/Litters

Litter  10/01/2021 (litter ad) Sire: Szürkebarát Ebenguba, puppy advertisement Puppies due the fall of 2021!, Photo: 1624487244.jpg

- **HU CH Szürkebarát Ebenguba ♂**  : 5478/08, 05/31/2006, Black, Actual Color: Silver Gray, Country of origin: Hungary, HD: HD C

- **GCHS Abiqua Opal CA BCAT SWN NW1 L1 ♀**  : DN45837802, 03/09/2016, Silver Gray, Country of origin: United States, Height: 17.5", Color loci: (KB/ky,at/at,B/B,D/D,E/e), CHIC #: 133275, HD: Good, Patella: Clear, DM: clear, PLL: clear

You can click on the "hamburger" next to the "Litter" and then go to the ad or edit the ad, or delete it. Then after the puppies are born, you can add their names and create their own pages all on one screen (edit litter).

Direct offspring/Litters

- edit litter ad
- delete litter ad
- edit litter

Place an Ad

Click on *place an ad* on the dropdown menu (see below).

This will bring up a popup window:

The image shows a 'Litter ad form' popup window. The title bar says 'Litter ad form' with a close button (X) on the right. The form has the following fields and options:

- 'Litter Ad Form Top Text' label.
- 'Mother*:' label with a text input field containing 'Csunyatelepi B'.
- 'Existing litters mother:' label with a text input field containing '-'.
- 'Father*:' label with a text input field.
- 'Date of Birth*:' label with a text input field.
- A dropdown menu is open next to the 'Mother*' field, showing a list of suggestions: '[click to make new dog]', '10 results', '...', '-Csunyatelepi Barackvirág, 1117/19', '-Csunyatelepi Barka, 5503/06', '-Csunyatelepi Biborka, DN59900201', '-Csunyatelepi Bodza', '-Csunyatelepi Borcsa, s/003730', '-Csunyatelepi Csábos, s/004097', and '-Csunyatelepi Dorka-Borka. 3042/99'.
- At the bottom are two buttons: 'CONTINUE' and 'cancel'.

Key in the mother's name (the system will give you the choice) and the father. Put in the potential date of birth, then click *Continue*.

Animals with unapproved changes

If you click on the *hamburger*, it will show you the changes that have been made. If you click on the  icon, it will take you to the dog's page where you can use the *hamburger* there to accept or reject changes.

The changes are listed and you can approve or decline each one, or approve or reject all of them. You can also:

1. Go to the dog's page
2. Go to the edit screen for the dog
3. Show the info for the dog
4. See the change log for the dog
5. Delete the dog
6. Approve all changes
7. Decline all changes

Change list

There are some conventions that will help understand what the changes actually were:

First are icons to Approve  or Decline  the change individually.

Next is the name of the Account that made the change.

After the hyphen is the name of the field that's been changed.

Then after that is what was originally in that field followed by ">", then what it was changed to.

Example 1:

  Jennycobb - PreTitle:GCHB > GCHS

In this case the user (Jennycobb) changed the PreTitle field from "GCHB" to "GCHS".

Example 2:

  Jennycobb - Registered Colour:- > Silver Gray

In this case the user changed the Registered Colour from <blank> to "Silver Gray". (There is only a space between the "-" and the ">".) In other words, there was nothing for Registered Colour and she filled that in.

Example 3:

  Kondacsipkedo - Source:iSmečka > -

The user in this case changed the Source of iSmečka (the Czech database) to <blank> since the dog originally had been entered from information in iSmečka, but had been corrected by the breeder. You can see here there that there is nothing after the ">" that it was changed to.

Example 4:

NEED HEALTH SCREEN SHOT CHANGES

Because there are multiple fields, only the field name will show.

If you click on the  , it will take you to the dog's record, also here showing the changes.

kennelname:

website:

 (www.example.com)

kennel information:

Outstanding Pumik since 1999 with 26 AKC champions (since 2016), 16 agility titlists including 4 MACHs. Titles in tracking, obedience, coursing, and nosework. AKC Breeders of Merit -

Free breeder/owner account:

With a free breeder/owner account you can:

- ♦ add your name as owner or breeder to a dog
- ♦ get a page with your dogs and, if you want, your contact information
- ♦ add your name to the breeders list
- ♦ put your dog(s) on the studdog page

We will show your country, your kennel name and/or personal name on this website.

☒ I want a breeder/owner account.

☒ I want a public page.

☒ Add my name to the breeders list.

Show this information on my public page:

☒ my personal name.
(If you have not entered a kennel name this is a required field.)

☐ my full address

☒ only my city and region

☒ my phone number

☒ a contact form so people can send me an email (the e-mail address will not be shown on this website)

Roles

Roles are:

Role	Explanation
Bot	
Unlogged	When a user first opens a page on the website they will be assigned to the "10: not logged in" user group.
Member	This is for a person who has an account but is not a breeder or owner.
Breeder	This is for a breeder or owner. This person can assign their own name to a dog as owner or breeder but no one else. The health fields are set up so that only the owner or breeder can add or edit them.
Admin	The role has the ability to add/edit and dog or user. On the administrator menu they have access to the Administrator screen (approve dog and user additions and changes)(, Manual, FAQ, license terms.

Super Admin	Access to all functions and settings. Menu options are: <ul style="list-style-type: none"> • Administrator • Translation • Settings • Fields settings • Menu • Database check • Manual • FAQ • License terms
-------------	---

Miscellaneous

Dog info wording at bottom – Translation page – search for animal form.

To add an email address at the bottom, go to Setting > Other

Email link on bottom of animal form: = “Yes” (It’s currently set to “No’

Number of dog in database”

Go to *Translation > Edit/translate text-areas > HomeTitleLang1*

Hungarian

Hungarian will be the other language (Judy Prios is now translating). So if we change Lang1, but sure to change Lang2 on anything.

Color Scheme

Go to Administrator < Settings and this is near the bottom of the page.
